

Rodrigo Nóbrega

Outsystems Web developer

FullStack Web developer

Dear Hiring Manager,

After almost 7 years of experience in the manufacturing industry, passing through large multinationals in the automotive sector, I decided to change areas and I found myself with a new challenge. Yes... Today I can consider myself the newest programmer in the field!

In 2020 during the pandemic I got to know the OutSystems lowcode technology, and after a bootcamp I graduated as a web developer. I carried out some case study projects where I managed to develop some skills in technology.

Recently, on 06/2022, I concluded the bootcamp for Le Wagon's FullStack Web Developer in Lisbon. During the course we used several languages as learning, among them... Ruby on rails, html, CSS, Javascript, among other tools. At the end of the course we created a team project, which I was very proud of. An application aimed at communities, where through an in-app currency, you can exchange services with your neighbors.

Take a look...

www.neighbud.me

In this journey I discovered where I want to go to become a great Developer. If you want to chat and talk about future work, just send a message!

Thank you very much for your time and consideration.

Sincerely, *Rodrigo Nóbrega*

Rodrigo Nóbrega

Mechanical engineer worked for many years in the manufacture of large automotive multinationals. Today in change of area for IT. On this path that I started a few months ago, I have acquired skills in outsystems and as a FullStack Developer participating in bootcamps.
